

ARTIFICIAL INTELLIGENCE & SOFTWARE

GABY ULJEE, CEO
TKH Innovations

TKH Capital Markets Day - 12 June 2019

DEVELOPMENT FOCUS

- **Artificial Intelligence (AI)**
 - **Distinct from and disrupt traditional solutions**
- **Cloud & Edge computing**
 - **Monolithic towards Microservices based architecture will bring us more scalability against lower costs**
- **Data processing**
 - **From data to more useful information and/or humanlike actions**
- **Data & Data-Exchange standards**
 - **Reusable data sources across our 4 core technologies will bring us more functionality and/or solutions**

Fred Wilson - venture capitalist

“Artificial Intelligence has inserted itself into our every day lives. Whether its a home speaker system that we can talk to, or a social network that already knows what we are about to go out and purchase, or a car that can park itself and change lanes on the highway automatically, we are seeing AI take over tasks that we used to have to do ourselves.”

ARTIFICIAL INTELLIGENCE

- We are in the age of AI
- It is not something that is coming
- It is here!

VISION &
SECURITY

Self-learning

SMART TECHNOLOGIES – TECHNOLOGY STRATEGY

CURRENT SITUATION DEVELOPMENT HUBS

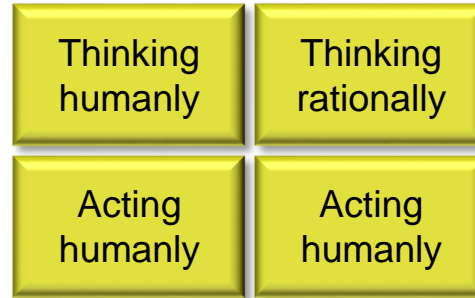

35% of our proposition comes out of software related solutions

- Established in 2012 to support OPCOs with:
 - Developing new concepts, like who-is-who, who-is-where, etc..
 - Enhancing (portfolio) synergies, like style-guides, data-exchange, data collection, way-of-working, etc.
 - Preventing double work, like the generic software ARC library
 - Supports OPCO with shift to new technologies, like migration to micro-services and implementing AI
 - **Provides framework for AI related applications incl. ML models**
 - Provides DevOps cultural philosophies, practices and tools
- Team
 - Team of highly skilled AI scientists and senior developers
 - Close corporation with OPCO development programs
 - Advise, Research, Proof of Concepts and Development of Algorithms

What is Artificial
Intelligence?

WHAT IS ARTIFICIAL INTELLIGENCE?

Traditional programming

Machine learning

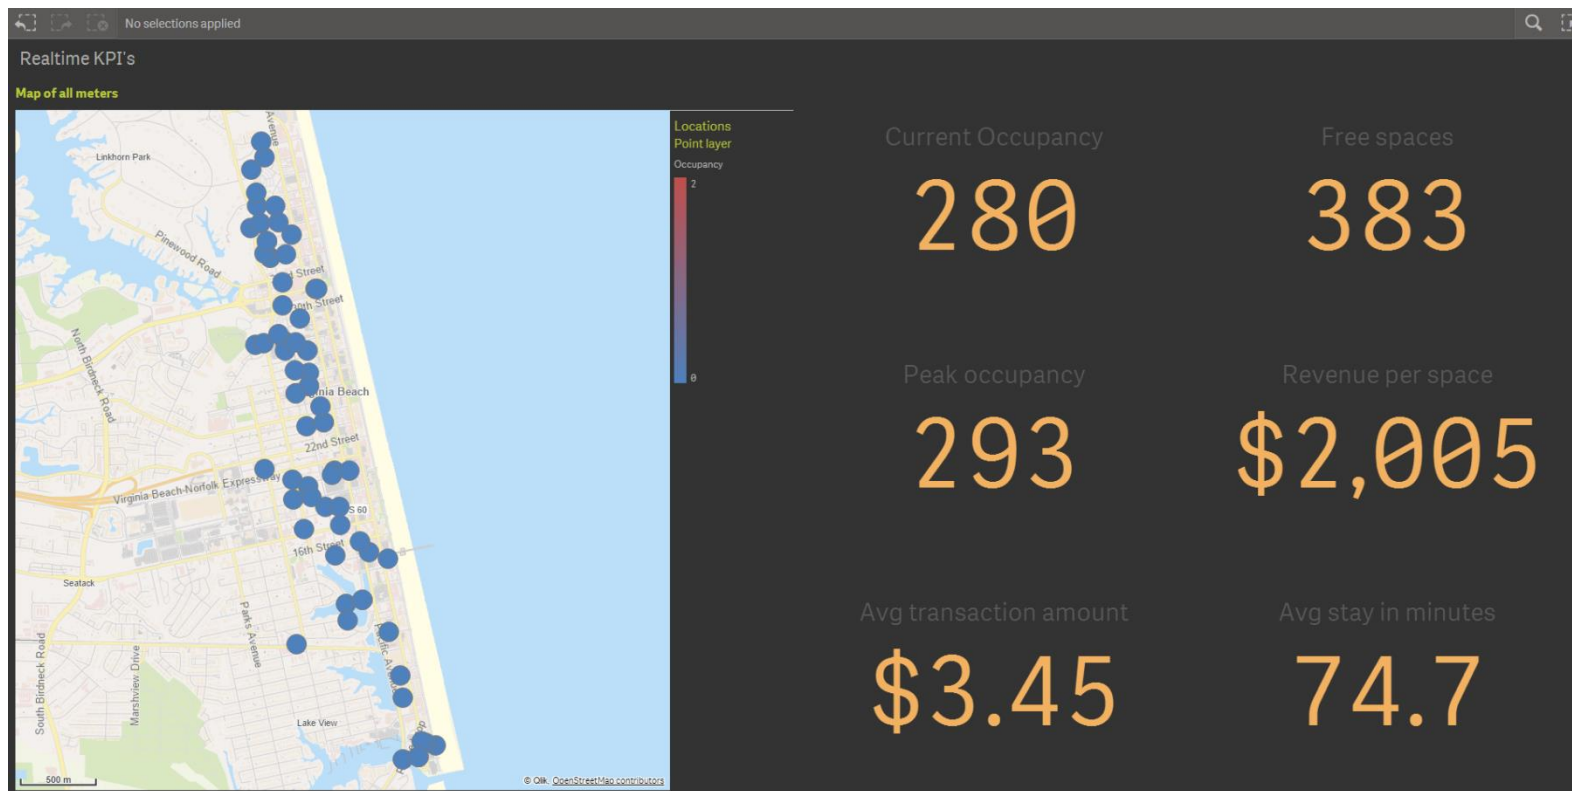

- ◆ We focus on solutions in 2 different directions
 - ◆ Machine Learning and
 - ◆ Cognitive applications

PARKING EXAMPLE

PARKING EXAMPLES

Revenue Forecast

VMI - ANTI PULSE CHALLENGE

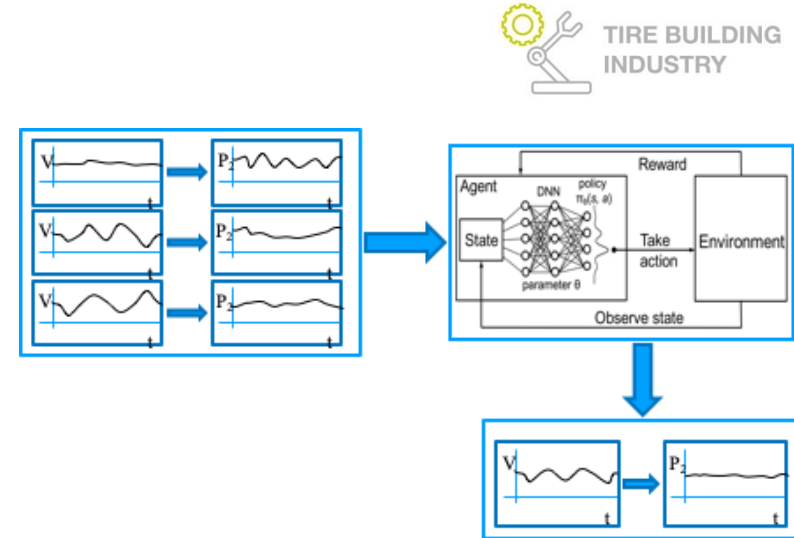

➤ Current situation:

- Weight variation during stripwinding
- Weight difference in correlation with gear pump speed
- **Pulsation in pressure of rubber valve has direct relation to tire quality**
- Reduction of pulsation has been implemented through an anti-pulse
- **Anti-pulse is hand-made and evaluated by eye**

> Development scope:

- > Determine optimal anti-pulse AI model
 - > Train model with historical data
- > Design a control algorithm
- > Implement and fine-tune in a test setup
- > Release for use in customer machines

Result

No additional effort needed for different machines/rubbers

Improved tire quality

EVACUATION SYSTEMS, COST & TIME REDUCTION PROGRAM

- Current situation:
 - Manually find optimum settings for Public Announcement system in tunnels to maximize speech intelligibility
 - Labour intensive; **up to a week per 750m of tunnel**
- Proof of Concept:
 - Simulate tunnel with noise and create algorithm to:
 - determine Audio Playback Delays for individual speakers
 - determine optimal synthesizer settings to emphasize import audio frequencies
 - verify speaker locations and if wiring is correct (speakers are not switched)
 - Algorithm designed such that the simulation can be replaced with real hardware in a real tunnel

Result

Week of manual labour can be replaced with AI software that does the job in 10 hours

PREDICTIVE MAINTENANCE

No selections applied

TATILLE - BRAND CLASS COLOR AND MODEL

- Business goal:
 - **Increase the added value in the security business**
(ANPR + BCC with the same camera)
- Functionality:
 - Vision-based detection of brand, class, color and model for travelling vehicles
- Solution:
 - AI model for image analysis
 - Completely vision-based
 - Travelling vehicle, no check point needed

TUNNEL & INFRA

PARKING

Plate	:	DH226GN-ITA
Date	:	2018/01/22
Time	:	16:00:48:406
Brand	:	Fiat
Model	:	Doblo
Class	:	CAR
Color	:	YELLOW

Result

AI solution provides complete vehicle information and simplified vehicle retrieving process

TATILLE - AUTOMATIC TRAFFIC ANALYSIS

TKH SECURITY - FLINQ FORESIGHT

- Dot on the horizon
 - **Fully automated & cognitive control room solution**
- Technology
 - Microservices based Architecture
 - scalable, reliable, traceable and secure
 - 70% of all the software components are reusable for other TKH OPCOs
- AI
 - Trace and learn behaviours from human operators
 - AI Model for automated event prediction and handling
 - **Cognitive awareness**

TKH CAPITAL MARKETS DAY

Thank you for your attention

12 June 2019

Statements included in this press release that are not historical facts (including any statements concerning investment objectives, other plans and objectives of management for future operations or economic performance, or assumptions or forecasts related thereto) are forward-looking statements. These statements are only predictions and are not guarantees. Actual events or the results of our operations could differ materially from those expressed or implied in the forward-looking statements. Forward-looking statements are typically identified by the use of terms such as "may," "will," "should," "expect," "could," "intend," "plan," "anticipate," "estimate," "believe," "continue," "predict," "potential" or the negative of such terms and other comparable terminology.

The forward-looking statements are based upon our current expectations, plans, estimates, assumptions and beliefs that involve numerous risks and uncertainties. Assumptions relating to the foregoing involve judgments with respect to, among other things, future economic, competitive and market conditions and future business decisions, all of which are difficult or impossible to predict accurately and many of which are beyond our control. Although we believe that the expectations reflected in such forward-looking statements are based on reasonable assumptions, our actual results and performance could differ materially from those set forth in the forward-looking statements.
